ABOUT ME

I am an ambitious Developer with the goal of achieving effective communication processes, clean records and costs saving both in development and maintenance of organizational or management activities.

Engineering student and web developer with the goal of applying my learnings in a clean and progressive way, adapting it to my work areas.

I will do this troubleshooting, problem de-escalating and results focus.

EXPERIENCES

- Led a group with more than 12 representatives and increased its effectiveness and results in 10%.
- Achieved 120% of the objectives in terms of obtained goal results in 2 different work areas.
- Reduced spendings of a 12 representatives group by 20% with the same final result.
- Kept Assertive and stable communication with clients and improved our relationship.
- Obtained 80% of the expected result as an average in every area I worked in.
